About Me

I am a results-driven computer science student with a solid foundation in front-end development. I possess a strong enthusiasm for generating groundbreaking solutions and making meaningful contributions to projects of significance. I am eagerly looking forward to utilizing my skills and furthering my knowledge within a collaborative work environment.

Experience

○ **Freelance Web Developer**
March 2024 – April 2024

Portfolio and Admin Panel Project

Developed a user portfolio website and admin panel using React and MongoDB. Designed a dynamic, responsive, and visually appealing front-end for the portfolio while implementing a robust admin panel for efficient content management. Leveraged React for the front-end, Node.js and Express for the backend, and MongoDB for database management, ensuring seamless updates and edits by the user. This project demonstrated my ability to create user-friendly applications with efficient content management systems.

PROJECT EXPERIENCE

○ University Website Enhancement Project

Designed and implemented a multipage website using HTML, CSS, Bootstrap, JavaScript, and PHP. Ensured a responsive and user-friendly experience for visitors
